Input for Organic Gardens
AFO CERT. NO. 222

MITES | WHITEFLY | CATERPILLARS | APHIDS | CURL GRUBS
MEALYBUGS | LAWN ARMYWORM | CITRUS LEAFMINER
FUNGUS GNATS | WINGLESS GRASSHOPPERS | SOOTY MOULD

HOW TO PREPARE

eco-neem is a biologically derived product that is active on the listed chewing and sucking insect pests on a wide range of ornamental plants and lawn. Consistent applications are necessary during pest activity. Mix well before spraying.

Compatibility: eco-neem is compatible with eco-oil (an emulsified botanical oil spray).

CAUTION

PLANT SAFETY: Trials on sensitive plants such as ferns, poinsettias and African violets have resulted in leaf damage. Testing a small area is recommended before spraying to determine sensitive species and varieties.

DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds. DO NOT feed treated grass clippings to livestock.

STORAGE & DISPOSAL: Store in the closed, original container in a cool, dry place out of the reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

SAFETY DIRECTIONS: Will irritate the eyes and skin. Avoid contact with eyes and skin. When opening the container and preparing product for use, wear rubber gloves. Wash hands after use. After each day's use wash gloves.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

FOR EMERGENCIES ONLY CALL: 1800 033 111 (24 HOURS).

LIABILITY: This product must only be used as directed. OCP will not be liable for any loss or damage due to a failure to strictly follow label directions.

eco-neem and eco-oil are registered trade marks and the OCP drop device is a trade mark of Organic Crop Protectants.

HOW TO USE

DO NOT use on plants that produce food for human or animal consumption

Plant/Situation	Pest	Rate	How to Apply
Ornamental plants	Two-spotted Mites	Mix 10mL per 5L water	Apply when pests appear. Re-apply every 7 days while pests are present. Good coverage is important so apply spray to upper and underside of leaves to point of run-off. Caterpillars: Use of an emulsified botanical oil spray additive is recommended. Mealybugs: Use the higher rate when pest numbers are high. Sooty mould: Spray insects directly above and around or within the sooty mould affected areas. Note plant safety CAUTION information.
	Whitefly		
	Aphids		
Home garden lawns, plant pots and garden beds (ornamentals only)	Caterpillars	Mix 15mL per 5L water	Apply at the first sign of pest infestation and before pest populations build up to damaging levels. Ensure thorough coverage of treated areas. Apply using a watering can.
	Sooty mould	Mix 15-30mL per 5L water	
Ornamental citrus	Wingless Grasshoppers	Mix 20mL per 5L water to treat 10 square metres.	Apply as a soil drench using a watering can. For Curl Grubs the optimum application time is peak egg hatch which occurs between mid Spring to mid Summer. Ensure thorough coverage of treated areas.
	Mealybugs	Mix 10mL per litre water	
Ornamental citrus	Curl grubs (African black beetle larvae)	Mix 25mL per 10L water	Begin applying when new flush growth is 4 cm long. Apply every 5 to 14 days with presence of new flush growth. Ensure that new flush leaves are sprayed on top and underneath.
Potting soil (for ornamental plants only)	Citrus leaf miner	Mix 30mL per 10L water	Apply as a soil drench using approximately 1 litre mixture per 8 litres potting soil.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED
